Nordic Marketing of Illinois, L.L.C.)

Application for Certificate of Service)
Authority under Section 16-115 of)
the Public Service Act)
_____)

Docket No. 04-0334

MOTION TO AMEND APPLICATION

Nordic Marketing of Illinois, L.L.C. ("Nordic") hereby respectfully requests that the Illinois Commerce Commission ("Commission") grant its Motion to Amend its Application for Certificate of Service Authority ("Application") filed with the Commission on April 13, 2004. Nordic received Notice of the Administrative Law Judge's Ruling electronically on April 22, 2004. Nordic respectfully requests that the Commission grant its Motion to amend its Application as follows (the rest of the Application remains correct):

Section 451.20 Nordic is supplementing its discussion of reciprocity in light of the Commission's recent decision in Docket 04-0118. The Court has imposed three conditions:

1. The applicant, its corporate affiliates, or the applicant's principle source of electricity (to the extent such source is known at the time of the application) owns or controls facilities, for public use, for the transmission or distribution of electricity to end users within a defined geographic area

to which electric power and energy can be physically and economically delivered by the electric utility or utilities in whose service area or areas the proposed service will be offered;

- Nordic does not own or control any transmission or distribution facilities and cannot identify its primary source of electricity at this time. However, Nordic will source its power purchases through transmission systems that are connected to the ComEd transmission systems. The transmission control systems that Nordic intends to use for scheduling electricity delivery are the Midwest Independent Systems Operator (MISO) and Pennsylvania-New Jersey-Maryland (PJM) systems. Each of these offer reciprocal sales and delivery opportunities for ComEd and other utilities in Illinois.
 - The Nordic power schedulers arrange daily schedules for Nordic Marketing, L.L.C. (which is a privately owned entity with no affiliations to Nordic Marketing of Illinois, L.L.C.) of retail electricity to customers in Michigan. In calendar year 2003, over 60% of the power scheduled came through the ComEd system. Some of the generation sales were sourced from ComEd generators. Nordic's schedulers have the ability, knowledge and technical skills to schedule power to and from ComEd.
2. that the applicant, its corporate affiliates, or principal source of electricity, as the case may be, provides delivery services to the electric utility or

utilities in whose service area or areas the proposed service will be offered that are reasonably comparable to those offered by the electric utility;

- Nordic does not have any corporate affiliates or principal source of electricity at this time that provides delivery services to the utility but intends to use delivery services that are the equivalent of the services used by ComEd. Scheduling energy delivery through MISO and/or PJM is the equivalent of the current status at ComEd. ComEd utilizes the PJM system and frequently sells and schedules power delivery through the MISO system.

3. that the Applicant certifies that it will remain in compliance.

- Nordic has certified in Section 17 of its application and again in Attachment 3 of the application that it will remain in compliance.

Section 451.220 Nordic had provided an irrevocable letter of credit for \$14,000.00, in a previous application and portions needed to be amended to satisfy the current docket number 04-0334. Upon signed approval by the Commission the issuing bank will make the following amendments:

- The expiration date will be changed to May 31, 2005.
- The beneficiary of the letter of credit will be “Incumbent utility on behalf of the Illinois Retail Customers”.
- The dates and docket numbers will be changed to April 13, 2004 and Docket number 04-0334.

Section 451.230 Nordic has corrected the Sections 12 and 21 to reflect the appropriate Code sections applicable to the technical requirements in its application.

Section 451.230 (b) Nordic regrets that it did not include detailed information on the technical qualifications of its staff. Below is a detailed list of managers and related experience for each:

John Baardson – Mr. Baardson has been involved in retail and wholesale power supply for over twenty years. He has personally been involved in both selling and purchasing power and executing power deals. He maintains a daily overview of the Nordic company's power portfolio. Mr. Baardson has personally been involved with OASIS reservations and at times will schedule for the Michigan retail company.

Michael Carosio – Mr. Carosio has been involved in both wholesale and retail electric sales. After a successful career in natural gas sales, he was made Vice President of Sales with the responsibility electricity sales in 1997. Mr. Carosio is the Vice President of Sales for Nordic Marketing of Illinois and will personally supervise all Illinois sales efforts.

Joni Fixel – Ms. Fixel has been involved in electric operations since 1984, involving generation, transmission, electric wholesale trading, retail electric operations and scheduling. Ms. Fixel has scheduled on Oasis and the NERC tagging system and maintains her certificate on the scheduling systems. Ms. Fixel

is available for emergency scheduling when the operations department requires assistance.

Stephan Swain – Mr. Swain has extensive experience in power purchasing and structured power deals. With over six years of experience in commodity and asset transactions, FTR's, Pricing Options, and risk management for the electricity markets, his oversight will help ensure customers reliable energy sources. Mr. Swain will continue his current duties as Director of Power Supply and Transmission. Mr. Swain monitors the daily power forecast and the operations and scheduling department.

John Imesch - Mr. Imesch has been a power scheduler for over 3 years for Nordic and will continue as Lead Power Scheduler. Mr. Imesch schedules power on the Oasis and NERC systems on a daily basis while maintaining the rules and practices for Nordic.

Jim Donovan – Mr. Donovan has recently joined the power scheduling team. He has recently been certified in Oasis and has learned the NERC tagging rules. He works as a back-up scheduler for the Michigan market and schedules ERCOT tags daily.

Corrections Nordic has corrected the typographical errors in section 3 and the incorrect code references in section 24.

WHEREFORE, Nordic respectfully requests that the Commission grant its Motion to Amend its Application as detailed above.

Respectfully submitted,

Nordic Marketing of Illinois, L.L.C.
